4 REASONS to change !!!

- GREEN IMPACT** T-ZERO PRO line therefore offer a precious contribution to climate protection. The products they use operate and run in a clean, quiet, safe and silent way, with very little impact on the environment. This is to preserve our natural resources.
- ROAD TO ZERO EMISSIONS** T-ZERO PRO line represents an increasingly eco-sustainable future, where working sites will mean reducing the world of construction is changing.
- SILENCE** Working in urban areas requires a high level of safety and security. The products of the T-ZERO PRO line are designed to be as quiet as possible, to ensure the safety and security of the workers.
- SAVINGS** T-ZERO PRO line represents an increasingly eco-sustainable future, where working sites will mean reducing the world of construction is changing.

Why T-ZERO PRO Technology

POWER AND EFFICIENCY IN SUSTAINABILITY this is the commitment of a range of machines unique in the world. Our **TARGET** is to change the future in the **CONSTRUCTION WORLD**. People use their tools to improve the environment around them, so why use diesel/petrol - why stay still on fossil fuels? The time has come to take up the challenge, and together, create a cleaner, quieter and safer future. Our desire to create an ever-greener future comes to life through our **GOAL 2025** initiative but isn't limited to the products we develop, it also permeates the ways we operate and the places we work in.

GOAL 2025

REAL BENEFITS of T-ZERO HYBRID/BATTERY PACK SYSTEM

- REDUCE FUEL COST** T-ZERO generators use hybrid technology (diesel or solar) to reduce fuel consumption. This means lower operating costs and a more sustainable future.
- REDUCE NOISE POLLUTION** T-ZERO generators are designed to be as quiet as possible, to ensure the safety and security of the workers.
- REDUCE CO2 EMISSIONS** T-ZERO generators are designed to be as eco-sustainable as possible, to ensure the safety and security of the workers.
- IMPROVED SAFETY** T-ZERO generators are designed to be as safe as possible, to ensure the safety and security of the workers.
- ALWAYS CONNECTED** T-ZERO generators are designed to be always connected, to ensure the safety and security of the workers.
- NO WASTE OF POWER** T-ZERO generators are designed to be as efficient as possible, to ensure the safety and security of the workers.
